SUMMARY

Informatics Engineering graduate with experience in full-stack web development, backend systems, database management, and Artificial Intelligence. Experienced in developing web applications, RESTful APIs, dashboards, and data-driven solutions using Python, JavaScript, Laravel, React, SQL, and related technologies. Familiar with system integration, API development, and AI-powered applications. Strong analytical and problem-solving skills demonstrated through internships, software projects, and technology competitions.

EDUCATION

Informatics Engineering Aug 2022 - 2026
Universitas Islam Negeri Sunan Gunung Djati Bandung GPA: 3.93 of 4.00
Relevant Coursework : UI/UX Design, Web Development, Machine Learning

TECHNICAL SKILLS

Programming : Python, JavaScript, PHP, Java
Databases : Neo4j, MySQL, PostgreSQL
Backend : FastAPI, Express.js, Laravel, RESTful API, API Integration
Frontend : React, Next.js, HTML, CSS, Tailwind CSS
AI & Data : Machine Learning, Large Language Models (LLMs), Prompt Engineering, Recommendation Systems, Content-Based Filtering, Knowledge Graphs, AI Agent Fundamentals, RAG Fundamentals
Tools : Git, Postman, Figma, Docker

EXPERIENCE

Full Stack Developer — Yayasan Berikan Protein Initiative June 2026 – July 2026
Developed the Purrtein Smart Cat Feeder web platform, including user-facing features and an admin dashboard. Built RESTful APIs using Node.js and Express.js, managed PostgreSQL with Prisma, and integrated Xendit payments, JWT authentication, Redis and BullMQ, MQTT-based IoT communication, WebSocket, Firebase notifications, and Docker-based deployment.

Junior Full Stack Developer Intern — PT Kreasi Bali Sasmita Apr 2026 – July 2026
Developed and maintained web application features for Parahita LMS using Laravel, Tailwind CSS, and Alpine.js. Implemented responsive user interfaces, authentication pages, role-based dashboards, and reusable UI components. Translated UI designs into functional web pages, integrated frontend components with backend functionality, improved user experience, and resolved bugs to ensure application stability and usability.

IT Intern – Linkup Career ID July 2025 – Dec 2025
Supported LMS operations by managing user access, assisting with login and class access issues, and ensuring participants could access online learning sessions smoothly.

PROJECTS

Personalized Mathematics Learning Platform Jan 2026 - Present

- Developed a full-stack mathematics matriculation platform using React, Tailwind CSS, Python, FastAPI, PostgreSQL, and Neo4j.
- Integrated Google Gemini with prompt engineering to extract mathematical concepts from PDFs, classify YouTube learning materials, and generate assessment questions.
- Designed a Neo4j Knowledge Graph connecting modules, chapters, concepts, assessment questions, and learning materials.
- Implemented Content-Based Filtering with Jaccard similarity to recommend learning videos based on students' assessment results and target concepts.
- Built RESTful APIs and role-based dashboards for administrators, lecturers, and students to manage learning content, assessments, and student progress.

Project Skillearn Sept 2025 - Present

- Developed backend services using Express.js and PostgreSQL.
- Implemented authentication and authorization features for learners and mentors.
- Designed RESTful APIs for course management and mentoring workflows.
- Optimized database queries and API performance.
- Collaborated with frontend developers to ensure seamless integration.

Project Tenangin May 2025 - Present

- Developed a machine learning classification model to predict student stress levels based on self-assessment and behavioral data.
- Performed data preprocessing, feature engineering, model training, and evaluation using Python.
- Designed and implemented a recommendation system to suggest nearby psychology clinics based on user needs and location.
- Contributed to frontend development and user interface implementation to improve accessibility and user experience.

AWARDS

Gold Medal in the International Invention Competition for Young Moslem Scientists by Indonesian Young Scientist Association (IICYMS) Aug 2025

Awarded Gold Medal in the Social Science category at IICYMS 2025 for developing Tenangin, an AI-based self-care ecosystem for student well-being. Organized by IYSA in collaboration with Universitas Komputer Indonesia (UNIKOM).

3rd Winner Hackathon IT Fair XIII by HIMATIF UIN Sunan Gunung Djati Bandung Feb 2024

Achieved 3rd place as part of the TechXplorers Team for developing the ULP (Psychology Service Unit) application. Contributed to research and UI/UX design to improve user experience and service accessibility.

CERTIFICATIONS

BNSP Associate Data Analyst Dec 2025 – Dec 2028
Machine Learning Engineer July 2025
TOEFA Dec 2024 – Dec 2026
